## EXPERIENCE

### Twigoh, CA, USA — Full Stack Developer (Remote)

February 2023 - July 2023

Twigoh is a social review platform that combines the visual connectivity of social media with easy-to-search, detailed info in a new food/service-driven reviews platform.

- Led a team of 3 developers to implement Leave a Review flow, integrating Google Maps API and Stripe API.
- Designed Reviews & Home pages with the UI/UX team using Figma.
- Successfully launched and deployed multiple beta versions of iOS/Android releases.

### Archon Tech Strategies, IN, USA — Full Stack Developer (Remote)

January 2022 - February 2023

Archon Tech Strategies is a security company that provides technology solutions that are flexible and customizable to meet customers' needs.

- Developed a communication application using Twilio API and AWS S3 for sending/receiving media and text messages.
- Designed and built a maintenance management application with TypeScript, Node.js, and MySQL, utilizing Docker for containerization.
- Conducted E2E testing using Puppeteer.
- Collaborated with the team to identify and resolve issues, ensuring high application quality.
- Assisted mobile development team in maintaining React Native applications for iOS and Android platforms.
